

ClamAV Guardian

Privacy Policy

Effective date: [Insert effective date] | Published by 7iNDA

TEMPLATE - NOT LEGAL ADVICE

This document is a general-purpose template drafted for ClamAV Guardian. It is provided as a starting point, not legal advice, and has not been reviewed by a lawyer. Replace the bracketed placeholders below and have it reviewed by a qualified professional before relying on it, especially if you distribute the software commercially or to users in jurisdictions with specific consumer-protection or data-protection requirements (e.g. GDPR, CCPA).

1. Overview

This Privacy Policy explains what information ClamAV Guardian (the “Software”) accesses and transmits, and what stays entirely on your device. ClamAV Guardian is designed to run locally on your machine, and the publisher does not operate any server that collects your personal data or scan results.

2. Information Stored Locally Only

The following is stored only on your own computer, under your ProgramData folder, and is never transmitted anywhere by the Software: your scan history and results, quarantined files and their metadata, application settings and preferences, watched-folder lists, and diagnostic logs.

3. Information Sent Over the Network

The Software makes outbound network connections only for the following purposes:

- **Virus definition updates** — the bundled ClamAV engine's updater (freshclam) contacts ClamAV's official update servers to download new virus definitions.
- **Application updates** — the Software periodically checks GitHub's public release API to see if a newer version is available, and downloads it directly from GitHub if so.
- **Automatic ClamAV engine installation** — if the ClamAV engine is not found on your machine, the Software downloads the official installer from clamav.net.

None of these requests include your files, scan results, personal identifiers, or any content from your computer — they are standard “is a new version available” and “download this file” requests, the same kind your web browser makes when checking for its own updates.

4. No Analytics or Telemetry

The Software does not include any analytics, telemetry, advertising, or usage-tracking components. The publisher has no visibility into how you use the Software, what files you scan, or what it detects, unless you voluntarily share that information (for example, by reporting a bug).

5. No Sale of Data

Because no personal data is collected by the publisher in the first place, none is sold, rented, or shared with third parties.

6. Quarantined Files

Files you quarantine are moved to a local quarantine folder on your own machine. They are not uploaded anywhere by the Software. You can restore or permanently delete them at any time from the Quarantine tab.

7. Children's Privacy

The Software is not directed at children, and the publisher does not knowingly collect information from children, consistent with Section 3 above describing that no personal information is collected in the first place.

8. Changes to This Policy

This Privacy Policy may be updated from time to time to reflect changes in the Software's functionality. Continued use of the Software after an update constitutes acceptance of the revised policy.

9. Contact

Questions about this Privacy Policy can be directed to [Insert contact email].
